The Period for Rep	MAILING DATE of this commun	nication appe	ears on the cover sheet w	ith the correspondence a	ddress				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3672

## **DETAILED ACTION**

# Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claim 10 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 10 recites that the phrase "continuous sensing comprises periodically sensing". Continuous and periodic have opposite meanings. It is unclear if the sensing is to be continuously or periodically.

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1 and 3-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Schultz 5,273,112.

Schultz discloses a method of optimizing production from a formation without creating undue risk of mechanical instability of the formation, comprising: sensing a bottom hole flowing pressure; comparing the bottom hole flowing pressure to a stability envelope for the formation; and adjusting fluid production to maintain the bottom hole

Art Unit: 3672

flowing pressure within a desired region of the stability envelope (col. 1, lines 57-col. 2, lines 14).

Referring to claim 3, Schultz discloses sensing the bottom hole flowing pressure repeatedly and periodically (col. 1, lines 57-col. 2, lines 14).

Referring to claim 3, Schultz discloses a computerized device to automatically compare the bottom hole flowing pressure to the stability envelope (col. 1, lines 57-col. 2, lines 14).

Referring to claims 4-5 Schultz discloses adjusting a valve or choke to change the fluid production rate (col. 1, lines 57-col. 2, lines 14).

3. Claims 1 3,7 and 29-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Birckhead et al. 6,536,522

Birckhead discloses a method of optimizing production from a formation without creating undue risk of mechanical instability of the formation, comprising: sensing a bottom hole flowing pressure; comparing the bottom hole flowing pressure to a stability envelope for the formation; and adjusting fluid production to maintain the bottom hole flowing pressure within a desired region of the stability envelope (col. 1, lines 1-20).

Referring to claim 3, Birckhead discloses a computerized device to automatically compare the bottom hole flowing pressure to the stability envelope (col. 1, lines 1-20).

Referring to claim 7, Birckhead discloses (fig. 1) using an artificial lift mechanism (60) to change the fluid production rate.

Application/Control Number: 10/727,870 Page 4

Art Unit: 3672

Referring to claims 29, Birckhead discloses a system for optimizing production of a fluid from a formation without incurring sanding due to mechanical instability of the formation, comprising: means (50) for monitoring a reservoir pressure of the formation and a bottom hole flowing pressure proximate a production completion, and means (60) for periodically adjusting the ratio of bottom hole flowing pressure to reservoir pressure to maintain the ratio at a desired position relative to a predetermined line representative of the maximum pressure ratio under balance for the formation.

Referring to claim 30, Birckhead discloses means (50) for monitoring comprises a pressure sensor.

Referring o claims 31, Birckhead disclose the means for periodically adjusting comprises a flow control mechanism (60) by which bottom hole flowing pressure is changed.

#### Allowable Subject Matter

- 4. Claims 8-9,11-28 are allowed.
- 5. Claim 10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/727,870 Page 5

Art Unit: 3672

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Giovanna M. Collins whose telephone number is 571-272-7027. The examiner can normally be reached on 6:30-3 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David J. Bagnell can be reached on 571-272-6999. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
